

FLOATER SET

EWAC
MEDICAL
We get you moving

The logo graphic consists of two stylized, overlapping wave-like shapes in orange and blue, with several small circles of varying sizes interspersed within the curves.

Nowadays, Aquatic therapy without the use of floaters is very rare. For almost every method in Aquatic therapy but also in patient-handling, floaters are a fundamental need to help provide the proper conditions.

EWAC Medical offers different type of Floater-sets. Varying from the basic needs in one set to the possibility to offer more active sessions with the other set. With or without storage options or user-charts, you will be enabled to severely enhance the possibilities in the pool for you and for your patient.

Floater-set Basic

The basic necessities for your everyday needs. With the Basic Floater-set you are able to set up almost every basic aquatic therapy session in the water. With 18 different items, all kinds of varieties can be done and with the user-charts new insights are given on how to apply and use the items.

Floater-set Active

Designed in such a way that you can organize a more active Aquatic therapy session. From individual exercises to complete training courses, the Active set provides the right tools. With no less than 31 items, the Active set will take your Aquatic therapy sessions to the next level. With the greater part of the Basic set incorporated and complemented with new and versatile items, the Active set has it all.

Floater-set Ultimate

A more luxurious set where the Basic and Active set are combined with a couple of larger items in combination with storage options. This enables you to give complete courses for larger groups. Not only in number but also in quality, this is a hugely enhanced Floater-set. Complete with training examples it is the Ultimate tool for your pool.
