

Burns treatment baths

Burn wounds are delicate

Treat them with care

EWAC
MEDICAL
We get you moving

www.ewacmedical.com

We believe that clients with burn wounds and other skin lesions deserve excellent care. Therefore we supply perfectly designed burns treatment baths which meet the strictest requirements with regards to hygiene, durability and ergonomics.

- We supply three types of burns treatment baths: -
- High-low bath
 - High-low elongated bath
 - Stationary bath

The high-low bath provides an ergonomical working position for the therapist and the client, which improves the overall effectiveness of the therapy. For the treatment of taller clients, there is an elongated high-low bath, which is especially practical for the treatment of facial skin wounds.

The stationary bath is very suitable for mobile clients who are more or less self supporting. Due to the large size of this bath it is more suitable for total immersion, floating or drowsing.

Dimensions (mm)	L	W	H
Stationary	2390	860	605
Hi Lo Standard	1905	800	500
Hi Lo Elongated	2245	800	500

EWAC Medical is Lloyd's Register Quality certified according to ISO 9001 and ISO 13485.

The burns treatment baths are made out of hygienically disinfectable stainless steel AISI 316 with a perfect finish, meeting the highest Standards for hygiene and durability.

Give clients the care that they deserve with an EWAC Medical burns treatment bath.
