Optimal water hygiene

Undisturbed water circulation

The floor moves faster through the water

Pool water can move through the surface undisturbed, because of openings between the tiles. Therefore:

- Optimal water hygiene
- Undisturbed water circulation
- The floor moves faster through the water

WATER PERMEABLE SURFACE

Water hydraulic cylinder means zero risk of contamination with toxic fluids

WATER HYDRAULICS

A total construction thickness of 30 cm, this is the thinnest movable floor in the market.

MINIMUM CONSTRUCTION THICKNESS

SAFE

- Strong stainless steel frame
- Safe non-slip surface
- Water permeable over entire surface
- Safe water hydraulics

SAFE

Maximum adaptability

Underwater treadmill
Underwater bicycle
Obstacle course
Camera’s
Counter current
Underwater massage
Self adjusting steps

MAXIMUM ADAPTABILITY

QUALIFICATIONS

- Certified as Class I Medical Device (MDD)
- ISO 9001:2008 Certified manufacturer
- ISO 13485:2012 Qualified supplier

DYE TEST

Only movable floor that passes the EN15288-2:2008 annex A Dye test

RETRO FITTING POSSIBLE

Can be installed in new and existing pools

Additional advantages

- Ready for use in 1 week
- Optimal water hygiene
- 25+ years lifespan
- Single point of contact
- Easy maintenance
- 80% recyclable materials
- No toxic fluids
- 800+ projects worldwide
